

PLUSGLIDE 47 SLIDING

In response to consumer demand for cost effective larger format doors, with more glass, we've introduced the PlusGlide 47 Sliding System, offering flexible living and large unobstructed views.

PLUSGLIDE 47 SLIDING

The PlusGlide 47 Sliding System provides a modern door solution with clean details and superb sightlines. The minimalist design includes a 47mm interlock and can accommodate a glazed unit up to 34mm, striking a perfect balance between cost effectiveness, aesthetics, thermal and acoustic performance, with panels measuring up to 2.5 metres (w) x 3.0 metres (h). PAS24 security is also available with the addition of extra lock points, reinforced interlock and anti-lift blocks.

MAX GLASS WEIGHT
280kg

EXCELLENT ENERGY EFFICIENCY
U-values from 1.1 W/m²K*

AIR PERMEABILITY
CLASS 3

NOISE PROTECTION
Up to 40dB acoustic reduction

WIND RESISTANCE
CLASS C5

EXCEPTIONAL WATER TIGHTNESS
CLASS 7A

OPENING OPTIONS

2, 3, 4 and 6 sash options | Monotrack (one pane + fix), 2 track and 3 track options

*dependent on product configuration, dimensions and glass

WEATHER RESISTANCE

All of our systems are tested to guarantee the very best performance in water tightness, air permeability and wind loads, achieving the maximum result in each category.

THERMAL PERFORMANCE

Energy efficiency is a vital element in building design, with demands made by both the architect and end-user – to reduce environmental impact and heating costs. Our systems are designed with high levels of insulation, creating comfortable homes right across the world.

ACOUSTIC INSULATION

Outstanding acoustic performance ensures that the home remains a private, intimate space free of external noise pollution.

MODERN AESTHETICS

We manufacture bespoke window, door and façade systems tailored to each individual project. The designs balance aesthetics with functionality and technical requirements.

UNLIMITED COLOUR RANGE

To add colour to the interior and exterior of the building, the aluminium frame can be powder coated or anodised on both sides, with a dual-colour option. For powder coating, choose from any RAL colour with metallic, textured and wood finishes also available.

LONG-LASTING PERFORMANCE

Aluminium is one the most durable and sustainable materials available. It has the strength and resistance to last a lifetime.

SUSTAINABLE SPIRIT

We are committed to minimising waste and the environmental impact of its products and manufacturing processes, through the use of sustainable raw materials and products, and the limitless recyclability of aluminium.

Our continued commitment to innovation allows us to offer high value-added products that maximise energy efficiency, thermal and acoustic performance and weather resistance.
